

CEMO

for safe storage

Mobile and stationary tank systems

Guide to safe refuelling: All versions, all the information.

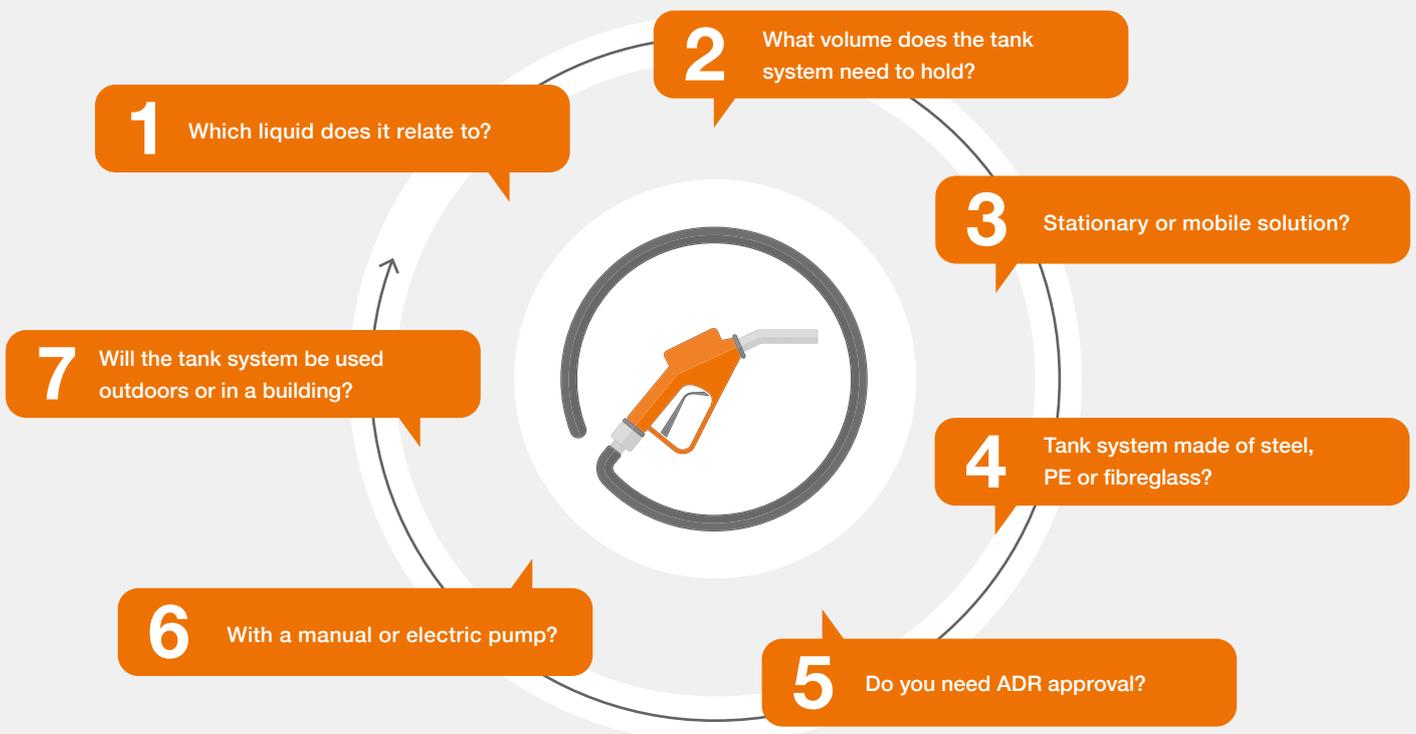

Time is money. We help you save both.

Increase your productivity with your own tank system.

Whether you use diesel, petrol, AdBlue®, lubricant or engine oil: CEMO provides everything you need to refill your vehicles and machinery. This provides you with many advantages, the most important of which has a cash value: You save working time. You no longer have the inconvenience of driving to the filling station when you have your own mobile or stationary tank system.

7 questions about customised refilling

We will be happy to advise you!

You can find all the information at www.cemo-group.com

Or give us a call to discuss your individual requirements.

Save money every year

If the nearest petrol station is 5 km away and your employee fills up their vehicle once a week, it would result in downtime of 30 minutes per week. This would be a total of 26 hours per employee per year, which if multiplied by hourly rate of pay, results in a lot of money lost to refuelling! By having your own tank system, this time and money would be

saved. For consumption of approximately 10,000L per year, savings can also be made on lower fuel purchase price.

You're playing it safe with CEMO: our solutions are manufactured in Germany, and always impress customers with their high quality and tested materials and accessories. They are designed to be easy to use.

Quality that protects
– the environment
and your company.

CEMO – Solutions for safe storage

Sustainability

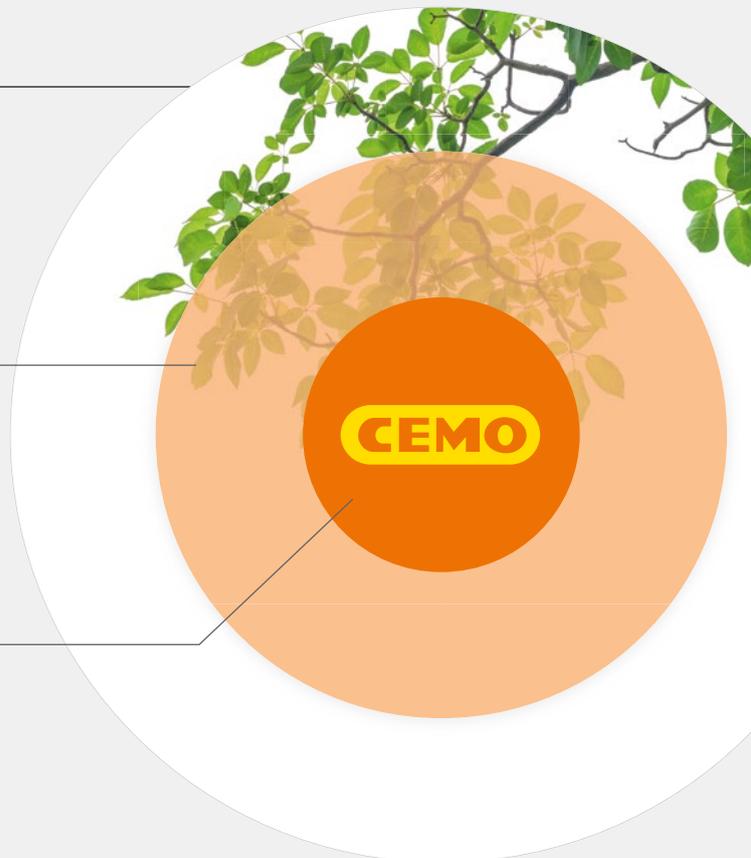

Durable and well thought-out: In the development of our products, we take environmental protection, as well as legal requirements into account.

Quality

Intelligent design and the highest quality workmanship make your hazardous materials storage efficient and economical.

Experience

Products with added value, expert technical advice, extensive training: With CEMO, you get everything from one source.

Stationary tank systems

Robust individual tanks up to 5,000 litres and complete systems up to 15,000 litres made of PE as well as steel tanks holding up to 30,000 litres. The indoor and outdoor versions of our tank systems make your business operations safer and more efficient.

Diesel filling station with steel tank

Double-walled steel tanks. Designed for 4,000 to 30,000 litres of diesel.

CUBE

No-compromise complete systems for diesel, AdBlue® and lubricants. Very robust thanks to honeycomb structure and steel banding.

UNI

HDPE tanks and compact systems for diesel or lubricants. With an integrated galvanised sheet steel bund.

Mobile tank systems

Fast and simple refilling: on construction sites, off the beaten track or in the field. CEMO's mobile tanks are available in a multitude of configurations and sizes. This guarantees that you will get the right solution for your requirements.

Product finder for mobile tank systems.

Mobil

Certification that never expires:
Individual tank systems for diesel or petrol,
double-walled and made from 2×3 mm
of galvanised sheet steel.

Mobil PRO

Optimum use of space thanks to cubic
design. Maximum durability thanks to the
inner container which is made of sheet
steel or PE. Also available as a 2-in-1
PRO COMBI solution for diesel and AdBlue®
for more efficient refilling on-site.

Mobil Easy

The practical solution for refilling on-site:
available for diesel, petrol or AdBlue®.
Compact and lightweight structure.
Also available as a 2-in-1 version for
diesel and AdBlue®.

Trolley

Manoeuvrable and easy to transport,
no more spills: fully mobile trolleys for
diesel, petrol, heating oil, lubricants
and AdBlue®.

1 Liquids

We ensure that you can store and transport your liquids safely. Our tank systems for diesel, AdBlue®, petrol and lubricant protect the environment and meet all the legal requirements.

2 Quantity

- ✓ **Flexible systems**
- ✓ **Storage capacity for all applications**
- ✓ **Easy to transport**
- ✓ **Easy to use**

From a 60L trolley to a 30,000L steel complete system: CEMO provides you with the optimum tank solution for all capacities, regardless of whether you require a mobile or stationary solution.

Diesel filling station for in-house consumption: The filling station may be used for an annual total output of a maximum of 100,000L. It is operated by you as the operator or by individuals you have commissioned. If a filling station has a capacity greater than 1,000L, it must be registered with the local water regulatory authority. Filling stations which store between 1000 and

10,000L must be audited once before commissioning by an expert according to the Federal Water Act. Filling stations which hold over 10,000L must be audited regularly by an expert according to the Federal Water Act. A permit is required for a storage capacity of over 5,000L.

Convenient filling

Thanks to its wide range of product versions, CEMO ensures that you are always using an efficient tank system.

3 Operation sites

Regardless whether in stationary, or mobile on-site operation: with CEMO, you can always fill your vehicles and machines quickly and in accordance with the relevant regulations.

- ✓ Stationary solutions
- ✓ Mobile solutions with ADR approval
- ✓ Mobile solutions exempted from ADR

When does the Craftsman Regulation apply?

The legal requirement for the use of mobile filling stations are set out in a European agreement, the ADR.

If you wish to make use of unrestricted transportation according to the Craftsman Regulation (1.1.3.1 c ADR), you need to take some requirements into consideration. For example, the fact that no more than 1,000 litres of diesel may be transported. More information and a checklist on ADR approval can be found in our catalogue.

with hinged lid

4 Material

The application is key: For the storage of larger quantities or use on construction sites, robust and durable steel is the suitable material. For ease of handling and flexible mobility, PE is the first choice because it is lightweight.

✓ Steel

✓ PE

Steel

Steel provides long-lasting safety for above-ground steel tanks or our Mobile Pro systems.

- ✓ High resistance
- ✓ Extremely durable
- ✓ Very high stability

Polyethylene

Tanks made from PE are corrosion-resistant over their entire service life.

- ✓ High strength
- ✓ Lightweight
- ✓ Wide range of designs
